The findings of this study also suggest that medical students who learn alongside students from a greater number of other health professions also report having 1) a better understanding of collaborative, interprofessional care of patients, and 2) significantly higher levels of overall satisfaction with their medical training.

Interprofessional Educational Opportunities and Medical ...

Since we usually cannot test an entire population (e.g., all second-year medical students), we must rely on sample data to guide our understanding of the truth. How well our sample represents the larger population determines how generalizable our findings are. Data collected in any study are subject to variation.
